Profile

Master's degree in Electrical Engineering and Computer Science (EECS). An accomplished professional in the telecommunication industry and customer services for over 10+ years with Europe, Asia, and American companies. All the time has been spent on pre-sales, product development, technical issues solving, project management and customer services with a bias towards post-sales services. My extensive background in many of the areas as telecommunication technical knowledge, service/product solution sales in sub-region, project delivery/management, and people management will be beneficial supporting new challenges as required position. SKILLS

5G Packet Core (5GC)

Experience with various vendors 5GC including Nokia CMU, Athonet, Ataya, Saviah, Druid

Computer Network CCNP level

Switching, Routing and firewalls. Prior experience with Cisco, D-Link and Nokia network equipment's. Network automation and scripting with Python.

Testing & Troubleshooting

Build automated test cases/lab.
Excellent problem-solving skills.

Mobile Edge Computing (MEC)

Familiar with Deep Packet Inspection (DPI) and 3GPP Compliance MEC. Shared core + MECs on customers site

Network Business

A clear picture of the telecom business. Experience working with OEM, ODM, SI.

Access Point (AP)

5G Fixed Wireless AP(FWA), xDSL, xPON, Wi-Fi Routers, Mesh.

Work History

Vertex System ~ Taiwan

2022-Now

5G SA/NSA Packet Core Engineer

- Performed Integration and Deployment of 5G (SA and NSA) Core Networks, Installation, commissioning, and maintenance
- Mobile Edge Computing (MEC) with various vendors such as Nokia, PacketX, ITRI
- Troubleshoot of existing 5G private networks devices including Nokia 5G SA/NSA Core, Routers, VPN, RAN, UEs
- Developing Automation Portal for Shared Core [Read More...](#)

D-Link Corporation ~ Taiwan**2017-2022****Network Consultant/Presales**

- Analyze and handle product inquiries from overseas business unit (ISPs) and provide solutions to troubleshooting.
- Support product planner and QA department for product validation, interoperability testing and benchmark testing.
